

Qns:

1.Default timeout in Selenium IDE

Ans:30000 milli seconds

2.Which command returns boolean value

Ans:isEnabled()

3.Select the command which is used to compare the contents of a table with expected value

Ans:verifyTable

4.Select the tab which gives you feedback and other useful information when executing tests

Ans:Reference

5.Select the operating system which is NOT supported by selenium IDE

Ans:Unix

6.Browser supported by selenium IDE

Ans:Mozilla Firefox

7.Phases of formal review process

Ans:1.Planning

2.Kick-off

3.Preparation

4.Review Meeting

5.Rework

6.Follow-up

8. Who leads the review process?

Ans:Moderator

9.Locators in Selenium-How to locate elements on web page

Ans:CSS Selectors,DOM,XPath,LinkText,ID

10.How do you get the rendered height and width of an element

Ans:getSize()

11.Documents which check for requirement coverage

Ans:Traceability Matrix

12.Language supported by Selenium web driver

Ans:Perl

13.Command allows you to define maximum timeout to wait for complete page to load

Ans:PageLoadTimeout

14.One of the fields on a form contains a textbox which accepts alpha numeric values identify the valid equivalence class

Ans:stor01e

15.If I want to check that title of page is matching for expected title or not but on failure it would not stop execution of script

Ans:VerifyTitle

16.Executing the same test again by giving the number of inputs on some build called as

Ans:Retesting

17.Beta testing is done by

Ans:End user

18.Test conditions should be able to be linked back to their sources in the test

Ans:Traceability

19.If command fails it will terminate excecution of scripts immediately

Ans:Assert

20.The testing which is done by going through the code is known as

Ans:White box testing

21.The switch is switched off once the temp fails below 18 and then pt is turned on when the temp is more than 21
Identify the equivalence value which belongs to same class

Ans:22,23,24

22.What is non functional software testing

Ans:Performance testing

23.Testing is context independent

Ans:False

24.Independent testing team is effective in uncovering the defects

Ans:False

25.Selenium RC needs server connection which executes in any browser

Ans:True

26.Component testing is done by

Ans:Testers

27.Component of Selenium allows user to write script and execute without server connection

Ans:Web driver

28.Quality Assurance method are

Ans:Preventive

29.Which element locator will not need exact string to identify required element

Ans:CSS Selector

30.We can define dependencies within groups

Ans:{dependsOnGroups{"GROUP_NAME"}}

31.Acceptance test case or based on what

Ans:Requirements

32.Test conditions are derived from

Ans:Specifications

33.Which of the following is not a type of incremental testing approach

Big bang

Top Down

Bottom up

Functional incrementation

Ans: Big bang

34.Which of the following technique is a White Box Testing?

Ans:Cyclomatic complexity

35.Level of testing

Ans:All the above

36.Unit testing is performed by

Ans:Developers

37.Beta testing is referred to as

Ans:User acceptance testing or end user testing

38.Exhaustive testing is possible

Ans:False

39.Quality assurance is

Ans:Process based

40.Quality control is

Ans:Product based

41.A plan to overcome risk method is called as

Ans:Risk Mitigation

42.Modules are tested , integrated together at once and tested is called as

Ans:Big bang

43.Selenium web driver is having limitation as

Ans:Cannot create test suite structure

44.Incase of Selenium IDE the source view shows your script in

Ans:XML format

45.Select the command that will NOT wait for a new page to load before moving onto next command

Ans:selectAndType

46.----- launch the browser and run the test. With entire test suite, it allows for running tests in parallel.

Ans:Selenium Grid

47. In webdriver, which methods navigates to a URL?

Ans: get("url")

48. Which Component is used to run multiple tests simultaneously in different browsers and platforms?

Ans: Selenium Grid

49.Selenium IDE doesnot support data driven testing

Ans:True

50.Is testing mandatory for test case execution

Ans:True

51.Select the command which is used to print a string value or a variable in Selenium IDE

Ans: The 'echo' command

53.Select the command which is not a type of assertion in Selenium IDE

1. Assert
2. Verify
3. WaitFor
4. Wait

Ans:Wait

54.Selenium can be used for

- 1.Functional testing
- 2.Database testing
- 3.Browser compatability testing
- 4.All the above

Ans:All the above

55.----- is a part of functional testing

Ans:Security testing

56.V Model is also known as

Ans:Verification model/Validation model

57.----- means that there are no faults at the end of test phase

Ans:Exhaustive Testing

58.All the modules of system are integrated and tested as complete systems in

Ans: Integration testing

59. Selenium does not support automation testing for

Ans: Desktop Applications

60. Identify **invalid X Path**

1. `//*[@class='feature box']/*[text()='Testing']`
2. `htmlbody/div[1]/section/div[1]/div/div/div[1] div[1]/div/div/div[3]
/div[1]div/h4[1]/b`
3. `\\xpath(body)/div[testing](td/tr/1)`
4. `./input[@name='uid']`
5. `\\img[@src='\\div\\images\\home\\java.png']`

Ans: 2,3,5 are invalid
